Brainstorming & Idea Prioritization

Project Name: FitBuddy – AI Fitness Plan Generator using Gemini Models

Project Idea

FitBuddy is a web-based AI fitness application designed to generate personalized workout plans and nutrition or recovery tips based on the user's fitness information.

The application accepts information such as name, age, weight, fitness goal and workout intensity. Using Google Gemini AI models, the system generates a customized 7-day workout plan.

Users can also provide feedback on their workout plan. The system can use the feedback to generate an updated plan.

Main Features

1. Personalized 7-day workout plan generation.
2. Nutrition and recovery tips.
3. Feedback-based workout plan updates.
4. User and workout plan storage.
5. Admin view of registered users and plans.
6. Web-based user interface.

Idea Prioritization

The main features were prioritized based on their importance to the FitBuddy application.

High Priority:

- User input form
- AI workout generation
- Personalized 7-day plan
- Gemini integration
- Database storage

Medium Priority:

- Nutrition tips
- Feedback-based plan updates
- Admin dashboard

Supporting Features:

- Responsive user interface
- Local deployment
- API documentation
