

Final Project Components

The final FitBuddy application contains:

1. FastAPI backend.
2. Google Gemini AI integration.
3. SQLite database.
4. SQLAlchemy database management.
5. Jinja2 templates.
6. HTML and CSS frontend.
7. Personalized workout generation.
8. Nutrition and recovery tips.
9. Feedback-based workout plan updates.
10. Admin user view.

The architecture and functionality of these components are described in the original project document
